

THE

# STANDALONE SOLUTION

TERMITES DON'T STAND A CHANCE

## PROTECT YOUR HOME AND YOUR WORLD.

The Sentricon® system eliminates the termite queen and her colony. Your home, your water, your land and your family remain protected. Protected against these deadly neighborhood destroyers.

Sentricon uses smart, proven green technology specific to termites, including tamper-resistant in-ground bait stations. And that's all the assurance you need.

 **SENTRICON**

## Rest easy knowing you're protecting your home and your environment.

The Sentricon® system is the standalone solution for complete termite colony elimination – without compromising the environment. The original Sentricon system is the only pest control product ever to earn the Presidential Green Chemistry Challenge Award, presented by the U.S. Environmental Protection Agency.

Recruit® HD termite bait is placed in every Sentricon station prior to installation. The bait remains contained within the station and cannot leach out into the soil or contaminate any water sources.

Termites feed on the bait, share it with their nestmates and the colony collapses. It's all you need to keep your home — and the environment — protected.
